Jessica:

As a follow-up to our conversation, I transmitted your request to the Area Command in Durango and also cc'ed Rich Mylott, my team leader.

I'm sorry you weren't able to reach anyone there directly but hopefully someone will get back to you soon.

If I can be of any further assistance, please let me know.

Thanks,

Laura Jenkins

**Subject:** media inquiry

Hi. I just had a couple of follow up questions based on Ms. Mccarthy's press conference.

1. When she said water quality is restoring itself based on samples taken, where were the samples taken from? Where along the river?
2. What exactly is the EPA doing now if the water is diluting itself... other than an investigation and making sure the mine itself is secure? Is there any EPA "clean up" at this point or is that not the goal right now since this is a substance that is diluting into existing river water?
3. I would like to request an interview with someone at the EPA regarding the efforts to ensure safety at other mines. Can this be accommodated?

Thank you,

Jessica Rosenthal
